

AS TOUGH AS THE JOB

ASP Handcuff Keys are designed to withstand the rigors of long term duty use. Conventional keys are stamped from mild steel. They often break or twist off in a handcuff. These “key jammed” restraints create civil liability and must be destroyed to cut them from the subject’s wrist.

Each ASP Key is hammer forged, then precision machined from stainless steel. The keys are heat treated for strength, then finished in one of five attractive coatings. A hardcoat lacquer is baked on for added protection. The unique ASP BackSet feature allows rapid location of the handcuff keyway.

Logo Keys feature distinctive Prestige insignias, full color State Seals or custom agency logos.

- A** Protective Keyring Swivel
- B** Recessed Logo
- C** Heat Treated Stainless Steel
- D** BackSet Lock Release
