

TRIAD[®]

Triad lights form the foundation of the ASP Duty Series of professional illumination tools. A look at the design, construction, fit, finish and illumination tells you that these are not consumer lights. They are not designed to be "just good enough." ASP lights were conceived, refined and built to be the finest, brightest, most advanced law enforcement lighting tools in the industry.

Triad lights are machined from bars of 6161 T6 aerospace aluminum. They are hardcoat anodized in a proprietary matte black finish. Each light has a foamed vinyl grip like the finest Tactical Baton.[®] Each Triad incorporates the ASP designed three position intermittent, locking, constant-on switch. Light engines are from the latest generation of Cree high performance LEDs. They are from a binning selected for its pure white chromonicity and high lumen output. The LED designation as well as an individual serial number are laser engraved into each light. Batteries are 3v Lithium CR123A primary cells. The shatterproof lens is water clear polycarbonate. A clip groove is machined into the lens and switch end of each light. A heat treated pocket clip and wrist lanyard loop snap into either groove. They are included with each Triad. Whether judged by brightness, features or durability, the ASP Triad is the finest law enforcement illumination tool on the market.

HYPER BRIGHT

LED LIGHT

- 293 Lumens
- 2 Hour Run Time
- 3 Position Switch

ASP Triad . . . Simply Brilliant

Background

- Designed to professional law enforcement standards
- Aerospace aluminum construction
- Precision machined
- No sharp edges
- O-ring sealed for maximum water resistance
- Distinct profile

Specifications

Length	5.5"	139.7 mm
Diameter	1.4"	35.6 mm
Weight	5.4 ounces	153.1 grams
	(with batteries)	
System	6 volt	
Flashlight Output	293 lumens	

Body

- 6061 T6 high strength aluminum
- Satin black hardcoat
- Coated threads for durability
- Exterior and interior scratch and corrosion protection
- Foamed vinyl grip
- Front clip groove
- Rear clip groove

Pocket Clip

- Detachable

Power Cells

- Two 3 volt Lithium (CR123A)
- PTC protected
- Safety vent
- Ten year shelf life
- Two hours continuous run time
- Leak proof
- Vibration resistant

Power Cell Tube

- Foamed vinyl grip
- O-ring sealed

Locking Switch

- Back mounted
- Quick and positive switch location under stress
- O-ring sealed activation button
- Locked (center)
- Constant on/off switch activation (right)
- Intermittent switch activation (left)
- O-ring sealed switch cover
- PC board positive circuit contact
- Sensitive and quiet switch activation
- Computer micro switch controlled
- Self-cleaning (no carbon buildup)
- Fail safe (backup) switch circuits
- Replaceable modular switch assemblies
- Optional intermittent switch activation
- O-ring sealed connection to the light body
- Rotate one full turn to prevent accidental activation

Reflector Assembly

- Total Internal Reflective (TIR) Optic
- Extremely durable
- Computer calculated ray traces
- Long distance penetrating beam
- Room illuminating halo
- Water clear acrylic optic
- Gasket sealed

LED Assembly

- Proprietary heat management
- Custom driver
- Smart chip technology
- Gasket sealed

Cases

- Injection molded
- Elastic technology

Warranty

- Limited Lifetime

SideBreak® and Duty Cases
protect and securely retain the Triad.

Lithium Power Cells are available in packs of 2 or 12.

Rotating the actuator to the left provides intermittent light.

The center position locks the Triad against accidental activation.

Positioning the actuator to the right provides constant illumination.*
