

# Patriot Lights...

*in appreciation of those who secure our freedom*

The Patriot® was the first ASP Wearable Light® to employ ChromaColor®. This striking new process fuses rich colors into the pores of aerospace aluminum. The vibrant pigments are as durable as the forged metal panels that they become a part of.

In the history of the men and women who protect and serve this nation are stories of incredible personal sacrifice and valor. It is this spirit of commitment and selflessness that are symbolized by the Patriot Series.

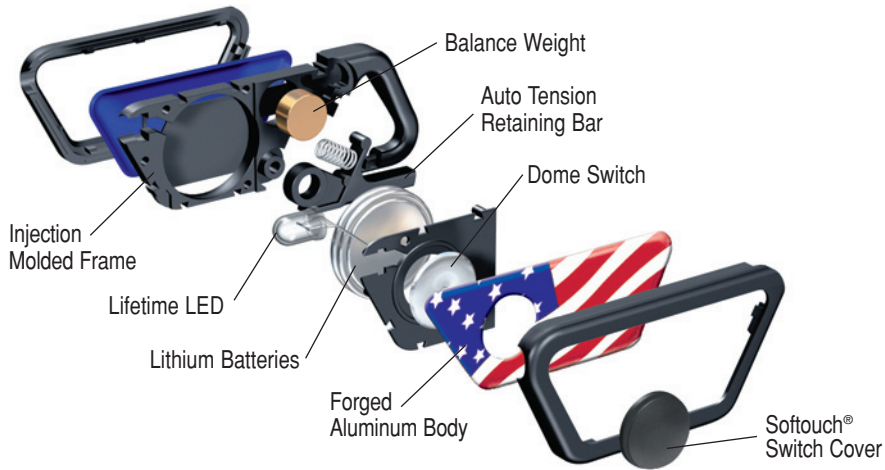

Each Patriot light incorporates a white lifetime LED with a high efficiency, non-deteriorating, solid state beam of incredible brightness. Each light provides soft illumination with a 180° viewing radius that is visible over one mile.

Patriot lights are bright, reliable and conveniently clipped. Each light symbolizes an appreciation for the men and women whose commitment to duty and country secure the freedoms that we cherish.

Made in the United States by ASP on the most sophisticated computer driven production machines in the industry, each model in the Patriot Series is guaranteed for a Lifetime of Light®.

# The Patriot Series... in appreciation of those who secure our freedom

**Tri-Ring® Clip** features a coil spring for smooth opening and automatic closing.

**LED COLOR**

**Background**

- Lifetime battery replacement
- Lifetime LED replacement
- Designed to professional standards
- Extremely bright
- Forged aluminum body
- Injection molded frame
- Integral retention clip

**Specifications**

|                                  |                     |            |
|----------------------------------|---------------------|------------|
| Length                           | 2.67"               | 67.8 mm    |
| Width                            | .95"                | 24.1 mm    |
| Thickness                        | .34"                | 8.6 mm     |
| Weight                           | .47 ounces          | 13.4 grams |
| System                           | 6 volt              |            |
| Output                           | Brilliant LED light |            |
| Produced to aerospace tolerances |                     |            |

**Panels**

- Die struck
- High strength aluminum alloy
- Bright dip industrial anodizing

**Frame**

- Engineering grade resin
- Water resistant
- Precision balanced
- Solid brass weight
- No sharp edges

**Batteries**

- 3 volt Lithium (two)
- Ten year shelf life
- Low temperature certified
- Leak proof
- Vibration resistant
- Fitted battery compartment
- Free lifetime replacement

**Architecture**

- Side mounted switch
- Intermittent
- Tactile dome activation
- Santoprene switch cover
- One hand operation

**Lamp**

- Lifetime LED
- High luminous intensity
- High efficiency
- Visible over one mile
- 100,000 hour rating
- Semiconductor based
- 180° viewing radius
- Solid state
- Minimal power requirements
- Minimal heat generation
- Non-deteriorating light
- Shockproof

- Vibration proof
- Impact proof
- Low voltage requirement
- Water clear acrylic lens
- Even light distribution (no hot spots)
- Free lifetime replacement

**Retention Clip**

- Triangular profile
- Coil spring tensioned
- Wide mouth
- Automatic attachment

**Available Custom Options**

- Laser engraveable

**Warranty**

- Limited Lifetime

**ASP ChromaColor®** . . . the high intensity, forged aluminum Lifetime Light®

**Genuine ASP**  
Look for the colored panels and contrasting frame.
