

Instructors Only

A Training Commitment

ASP has one of the few product lines in the law enforcement industry that is totally training driven. We believe in training, conduct training and support professional training. This orientation is evident in every aspect of ASP activity.

ASP products and ASP training are designed for the reality of the street. They reflect a total commitment to excellence for those who can afford no less.

This set of products was assembled exclusively for ASP Instructors. It represents our commitment to those entrusted with the unique responsibility of "protecting those who protect."[®]

ASP Instructor Set . . . as Tough as the Job

What's In It For You?

The Trainer's job is a difficult one. We know. We've been there. To make things a bit easier, we have put together a custom set of ASP products. This is a premium set of the best from ASP.

The Cost

Quality products are expensive. These are the best of the best. As such, they have a retail value of over \$2,000.00. Your cost is actually less than the items cost us to make. In fact, a portion of the cost of each Instructor Set is paid by the ASP Sales Division.

Why Do It?

We will put the quality of ASP products against anything on the market . . . at any price. The only way that officers can truly appreciate the quality of ASP is to put their hands on our designs and examine them. We want to put items in the field and let officers actually work with them.

The harshest test of any product occurs in training. During instruction, batons are subjected to greater impact, greater stress and greater abuse than occurs even in the field. That's why we want you to have an opportunity to work with all ASP products and subject them to the toughest test of all . . . the officers in your classes. Everything made by ASP carries a lifetime, "no questions asked" guarantee against defects in material or workmanship.

The Catch

There is one stipulation. This offer only applies to AIC Instructors. You must be a coin holder and provide your Certification Number with the order.
